

**S11 Fig. Densitometric analysis of EphA2 and EGFR phosphorylation and protein levels.** (A) Phosphorylation of EGFR in uninfected OKF6/TERT-2 and TR146 cells. (B) Phosphorylation of EphA2 and EGFR in TR146 cells exposed to yeast-phase *C. albicans* for 30 and 90 min. Data are the mean  $\pm$  SD of 3 independent immunoblots. Images of representative immunoblots are shown in Fig 5E and 5F. Data were analyzed using the two-tailed Student's t-test assuming unequal variances. \*,  $P < 0.05$ , \*\*\*,  $P < 0.001$ .
